## THE POLICY ON QUALITY AND SAFETY OF PRODUCTS AND THE ENVIROMENTAL MANAGEMENT

is based on the vision that Tovarna olja GEA d.o.o. becomes recognized European producer of vegetable oils, mayonnaise and mayonnaise products.

The defined mission of the company is the production of high-quality and safe products based, on the principles of safety and quality management, legality, product authenticity and good manufacturing practice.

### QUALITY AND SAFETY OF PRODUCTS

- ⦿ To achieve goals in the field of safety and quality, legality, authenticity of products and processes, as well as tacking care of health of the employees and the environment, we constantly monitor and measure key parameters, we prevent irregularities and introduce improvements.
- ⦿ We provide procedures for communicating with customers and thereby understanding their needs and requirements and strive to exceed their expectations.
- ⦿ We achieve the required product quality and safety as well as an appropriate attitude towards the environment through timely preventive actions, ongoing educations, targeted guidance, appropriate motivation and an ethical attitude towards all employees, thereby building a culture of food safety.
- ⦿ By recognizing and introducing modern trends, we strive to constantly improve the situation in the field of product safety and quality, as well as environmental management, and accept a commitment to sustainability, sustainable development and environmental protection.

### ENVIROMENTAL MANAGEMENT

- ⦿ Aspects of environmental protection and safety, reduction of emissions, waste and risks, lower consumption of energy and natural resources, are important starting points for business planning in the company.
- ⦿ In the company, we ensure compliance with mastery of applicable legislation, with the aim of fulfilling obligations regarding the compliance of the company's operations and putting safe, high-quality and environmentally acceptable products on the market.
- ⦿ Production processes are managed in such way that the health of employees and the surrounding residents is not exposed to danger, as we follow the requirements of our business processes and constantly improve them.

Implementation of the policy of quality, product safety and environmental management, which is accessible to the public, is the responsibility and commitment of all company employees.
